

RITE NOW @ ROP

Recently our horsemanship students were able to take a field trip and learn about state of the art equine sports medicine and its relevance in the competitive world of performance horsemanship.

Tahoe Equine is a full-service equine rehabilitation and conditioning center in Gardnerville, Nevada.

Our students were able to tour the fully indoor facility that included a salt water spa, an inground Aqua Treadmill, and an eight horse Eurocizer. We also learned about RLT Regenerative Laser, Pulse Electromagnetic Therapy, and shockwave.

The staff at Tahoe Equine Rehabilitation Center were impressed with our students as they represented Rite of Passage with integrity and excellence. They contributed thoughtful questions and observations during the tour and after.

Many students were motivated by the vocational aspect of obtaining an entry level position in the equine sports medicine field and the doors it might open for their growth and future in the equine industry.
